I have committed my life to climbing. I have travelled the world for the past 30 years, climbing with some of the world's greatest and at times **leading the way.**

Performance counts, and today's elites need to get the absolute best from their gear – whether it's hardware or clothing. It needs to be slick, robust and utterly dependable. I am interested in both substance and style, and I want a say in the climbing products I use daily. I feel I have the insight to design products that people want and which will help them get the most from their climbing, whatever their level.

The Moon team are all dedicated, talented climbers with a broad range of expertise to draw on.

Personal experience is undoubtedly the best way to learn something, whether it be how to place gear, how to train hard and stay injury free or how to pick the best crash pad for the job in hand. All of us at Moon have learned the answers to these and many other questions, and we're still discovering stuff. We certainly don't claim to know everything, but we want to share what we do know.

I hope you enjoy what's on offer and that you benefit in some way from the products and information you find.

MENS PANTS

THE CYPHER SERIES

Now with stretch!! Our best-selling Cypher series and a perennial favourite has been updated based on your feedback. The fabric is a mid-weight poly/cotton blend for durability. It's quick drying and wind resistant, perfect for cool days on the rock. The tried and tested articulated knee, diamond gusset and adjustable hem means as much freedom of movement as ever, but a new slimmer fit gives them a cleaner line. Clever tweaks mean that the adjustable hem is now fully integrated, so you won't ever see or tread on the shock cord, and a new integrated belt means you can synch in when the going gets tough. We've included snap pockets on the hips and generous back pockets for your personal effects. Distinctive Moon branding features on the trim with a discrete Moon logo on the thigh.

THE SAMURAI SERIES

Now with stretch!! Ideal for hot rock outings (or getting sweaty indoors), the Samurai range is easy to pull on and easy on the eye. Made from light-weight, quick-drying yet tough fabric, the design incorporates the articulated knee and diamond gusset that make Moon pants so easy to climb in, while the flat elasticated waist and low-profile pockets mean they fit neatly under a harness. The trousers have an elasticated ankle, so there's no annoying flapping, and no excuses that you can't see your feet. Moon branding is discreet, with contrasting trim and logo. This is a pared down, clean design aimed at serious sun rock seekers who want to get on with the job in hand with minimal fuss.

CRUCIBLE PANT 10-150

Styled for everyday living with design features aimed at boulderers, the Crucible pant is a versatile, hardwearing addition to the Moon line. The relaxed, straight leg cut makes them easy to wear, while the panel gusset and articulated knee mean they won't restrict your flow over rock or plastic. Talking of flow, there are also ventilation eyelets on the inside leg to help you keep your cool. Beyond the usual functionality and quality, discrete branding on the trim further ties the product in to the Moon stable. Set to become a classic, up there with the Cypher pant.

Sizes: XS,S,M,L,XL
Colours: Buckthorn, Covert Green
Fabric: 97% Cotton 3% Elastane
Purpose / Activity: Routes/crossover (lifestyle)

WOMENS PANTS

THE SAMURAI SERIES

Great for warm days out (or indoor workouts), the Samurai range is easy to wear and casually stylish. Made from light-weight, quick-drying yet durable fabric, they feature the articulated knee and diamond gusset that make Moon pants so easy to climb in. There's a harness-friendly elasticated waist that you can roll down, which looks great with one of the vests or crop tops for a really relaxed feel. The low-profile pockets fit nicely with the style and don't interfere with gear. The trousers have an elasticated ankle, so there's no annoying flapping and no excuses that you can't see your feet, while you can easily roll up the hem on the shorts. Moon branding is discreet, with contrasting trim and logo. This is a pared down, clean style aimed at serious sun seekers who don't want any fuss, so an ideal travel companion.

MINI CYPHER PANT 35-004

One trip out bouldering or serious outdoor messing and that's another pair of trousers in the bin – not any more. Moon has stepped in with a kid-friendly version of the Cypher pant that parents will love too. Made from the same stretchy, durable fabric and with the same Moon features for style and ease of movement as the adult versions, there's added re-enforcement on the knees, bum and ankle to withstand sliding down rocks. A soft, elasticated waistband with adjustable drawcord and easy access side pockets help make these a really versatile design. So go for it kids: rough and tumble, no problem.

For many years our customers have reaped the benefit of our MoonBoard system and there are now hundreds of MoonBoards all over the world both in private and commercial facilities.

WHAT IS THE MOONBOARD?

The MoonBoard is a simple flat paneled climbing wall 2.44m wide by 3.15m high, angled at 40 degrees and set with a selection of user-friendly holds consisting of crimps, pinches, slopers and pockets. This type of training board is the most effective strength training tool for climbing.

THE MOONBOARD CONCEPT IS SIMPLE.

It is a standardised training board easily built by the user to a standard specification (height, width, angle and t-nut grid). All MoonBoard holds are numbered and have a clear compass direction indicator. The MoonBoard holds and the standardised training board allows users all over the world to climb and train on the same problems as each other. It also has a built in logbook to record all your ascents including the number of tries it took for you to complete each problem.

This MoonBoard system is supported by our website www.moonboard.com and our new free MoonBoard App. The MoonBoard website and App allows MoonBoard users to view and download the current hold set up (hold position and orientation) and a list of MoonBoard problems which have been set by users all over the world. The user is also able to add new problems and sort existing problems by grade (user grade and route setter grade), route setter, user rating, newest, oldest, easiest and hardest.

WHAT IS THE LED MOONBOARD?

The MoonBoard LED system brings easy identification of problems to the MoonBoard. Beneath each MoonBoard t-nut position is an LED light, which is controlled by our MoonBoard App. When the user selects a problem on the App, the holds that make up that problem are illuminated by their corresponding LED lights.

Our new LED system gives users access to 100s of MoonBoard problems in just a click and a swipe, making the MoonBoard training facility even more user-friendly and accessible than ever before.

WHAT IS THE MOONBOARD APP?

Our new (and free) MoonBoard App brings all the benefits of the MoonBoard website to the user's smart phone or tablet. It also includes several new features. The key features of the MoonBoard App are as follows.

- The user can choose the MoonBoard hold set up used on their wall.
- View problems.
- Light up problems (LED MoonBoard required).
- Easily and quickly add, sort & filter problems.
- Built in logbook to record all your ascents
- Grade and rate problems
- Create multiple lists of problems (e.g. warm ups, favorites, projects, training routines).
- Add users for group MoonBoard sessions.
- Works on iOS, Windows and Android.

“As an exercise climbing is unrivalled, since every muscle in the body is used. It teaches judgment and courage and coolness in emergency, and makes you forget completely all the worries of everyday life. It is a wonderful chance for adventure in pure air and magnificent surroundings. Few who start climbing ever give it up. Once a climber always a climber.”
