

GREGORY®

We're a small but focused company, driven by our love for the outdoors and our desire to help others make their own journeys. Gregory was born with a simple mission: to enrich the lives of our customers, and thanks to you we've come a long way since pioneering the technical backpack business. It's hard to believe it has been four decades and we're still improving the product in ways unimaginable in the beginning. And while we are proud of our mission and what we have accomplished along the way, ultimately we'd be nowhere without our most important asset: our customers.

We're humbled by our customers, not only because of your passion for adventure, but because of your loyalty. While some of you are new to Gregory, many of you have a history with Gregory that stretches back to our beginnings. It's this passion and loyalty that inspire us to build the best products possible. On this special mark in time for us, we want you to know we feel you're as much a part of Gregory as we are, and we can't thank you enough for 40 great years. Here is to the next 40!

BALTORO & DEVA

BACKPACKING

Do it. Take a day, or a week, or a month, or a whole season and do what you've been saying you would for years: hit the trail. We guarantee that when you come back, you'll be a different person.

But before you go, be sure you're ready for the journey. Ready for endless miles of winding trails, sun-baked desert, hushed forest hideaways, heavenly mountain passes and hard, gritty pavement. It will take confidence—not only in yourself, but in your gear.

That's why we've poured every ounce of experience, knowledge, and technology we possess into designing and engineering the Baltoro and Deva series of packs—to give you the ultimate in backpacking comfort, performance, and style.

MATERIALS

BODY high-tenacity 420D nylon & 210D molecular cryptorip nylon

BASE high-tenacity 630D nylon w/ foam and 135D high-density polyester reinforcement layers

LINING 135D high-density embossed polyester

HARNES/ HIPBELT/ LUMBAR Dual-density, comfortzone lifespan EVA and open cell foams

CHASSIS SUPPORT 7mm solid 7075 aluminum wireframe & spring steel anti-barreling stay & HDPE

BALTORO 95 PRO

The new Baltoro 95 brings the same award-winning features and superior ride of our flagship Baltoro series, plus an upgraded Response Pro chassis and material selections to handle extended backcountry adventures. The Response Pro chassis creates a fixed link between the hipbelt and backpanel for additional load support and weight management, making it the new standard for guide use and high alpine trekking. With the fully loaded Baltoro 95, backpackers can tackle longer objectives, guides can carry first aid and extra supplies, and mountaineers and cold-weather campers can utilize the additional space for bulky winter gear.

RESPONSE PRO SUSPENSION

Increased capacity means heavier loads, and when full, a larger pack means more distance between the load and the user's center of gravity. Response Pro compensates for these factors with a thicker aluminum wishbone frame, a full-back-length framesheet, and an upgraded non-pivoting Response Pro hipbelt to provide increase support and stability throughout the entire chassis.

Response Pro hipbelt and harness components are fully interchangeable with the auto-adjusting QuickSwap 3D Pre-Curved hipbelt and harness components found throughout the Response A3 series. Current Baltoro owners desiring additional support for heavy gear loads can purchase and swap out their auto-pivoting Response A3 hipbelt with the Response Pro locked-out version of their existing Response A3 belt.

BALTORO

RESPONSE A3 SUSPENSION

At the heart of the Baltoro series lies A3, the latest evolution of our groundbreaking, award-winning Response suspension system.

The proprietary A3—or Automatic Angle Adjust—chassis is the reason these packs remain comfortable and balanced, adapting to your body and maintaining your center of gravity through shifting terrain, conditions, and intensity levels.

Response A3 technology makes this the lightest, most dynamic and versatile Baltoro series yet.

RESPONSE A3 TECHNOLOGY

A RESPONSE A3 SUSPENSION
adjustable, independently pivoting shoulder harness and hip belt load panels that actively adapt to different body shapes and help maintain load balance in varying terrain

B WISHBONE FRAME
an innovative 7075 aluminum alloy internal wire frame that defines the perimeter of the back panel and channels the load to the center of the lumbar region for dynamic support

C ULTRACUSH BACKPANEL
ventilated center channel composite with LifeSpan multi-layer EVA foam and silicone grip overlay at the lumbar region for maximum comfort and stability

D LUMBAR TUNE
a removable EVA foam shim offers the user customizable contouring in the lower back lumbar region

E QUICKSWAP 3D PRECURVED COMPONENTS
ergonomically tapered shoulder harness straps and hip belts in multiple sizes, featuring LifeSpan foam and a new easy-change design for quickly finding the perfect custom fit

F COMFORTZONE HIPBELT CONSTRUCTION
multi-layer, multi-density LifeSpan EVA foam padding engineered to provide support where needed and relieve pressure on sensitive areas

DEVA

♀ RESPONSE A3 WOMEN'S SUSPENSION

The Deva series of packs features A3 Women's, the women's-specific suspension technology that builds on our groundbreaking, award-winning Response suspension system.

The proprietary A3 Women's—or Automatic Angle Adjust—chassis is the reason these packs remain comfortable and balanced, adapting to your body and maintaining your center of gravity through shifting terrain, conditions, and intensity levels.

Response A3 Women's technology makes this the lightest, most dynamic and versatile Deva series yet.

RESPONSE A3 WOMEN'S TECHNOLOGY

A RESPONSE A3 WOMEN'S SUSPENSION

adjustable, independently pivoting shoulder harness and hip belt load panels, optimized for female body contours via custom curvatures and canting at the shoulders and hips

B WISHBONE WOMEN'S FRAME

women's-specific 7075 aluminum alloy internal wire frame that defines the perimeter of the back panel and channels the load to the center of the lumbar region for dynamic support

C ULTRACUSH WOMEN'S BACKPANEL

ventilated center channel composite featuring LifeSpan multi-layer EVA foam, women's-specific shaping, and a narrower footprint for maximum comfort, plus silicone comfort grip at the lumbar region for stability and stability

D LUMBAR TUNE

a removable EVA foam shim offers the user customizable contouring in the lower back lumbar region

E QUICKSWAP 3D PRECURVED COMPONENTS

women's-specific, ergonomically pre-curved and tapered shoulder straps and hip belts in multiple sizes, featuring LifeSpan foam and an easy-change design

F COMFORTZONE HIPBELT CONSTRUCTION

multi-layer, multi-density LifeSpan EVA foam padding engineered to provide support where needed and relieve pressure on sensitive areas

PACK DETAILS

1 Shock locks
Dual shock cord ice axe/trekking pole retainers

2 Weathershield pocket
A TPU-coated and sealed hip belt compartment, sized for smartphones or other digital devices and features a highly weather-resistant YKK AquaGuard® zipper closure

3 Sidewinder bottle holster
A side-mounted, ergonomic, stow-away bottle/accessory pocket with a mesh drawstring closure for securing loose items. A beloved Gregory feature

4 Raincover integration
Raincover stows in its own mesh compartment inside an external vertical-zip pocket that doubles as accessory storage in mild weather (raincover included)

5 U-zip access
Top-loading design with a front U-zip panel that opens from top to bottom for rapid access to main body contents

6 Sleeping bag compartment
External access with removable internal divider

CUSTOM FIT

Go beyond adjustability and enter the truly customized fit experience created by QuickSwap 3D Precurved harness and hip belt components. Three harness options and five hip belt sizes mean up to fifteen possible fit combinations for every Baltoro and Deva model in every torso length. Meanwhile, the removable Lumbar Tune insert gives users the ability to dial in curvature in the lower back panel for perfect support. By properly correcting shape in multiple dimensions rather than simply adding or subtracting strap material along a single plane, QuickSwap components eliminate dead spots, pressure points, and friction to fully realize the dynamic efficiency of Response A3 suspension.

1 Torso length*

An accurate torso measurement ensures the majority of the pack's load is correctly transferred onto the main structure of the body - the hips

* See appendix for instructions on how to measure torso length

Men's: S, M, L
Women's: XS, S, M

2 Hipbelt size

Pre-curved, ergonomically tapered hip belts in multiple sizes, featuring LifeSpan foam and a new easy-change design for quickly finding the perfect custom fit

Sizes: XS, S, M, L, XL

3 Shoulder harness size

Pre-curved, ergonomically tapered shoulder harness straps are available in multiple sizes, featuring LifeSpan foam and a new easy-change design that allows fine tuning within each harness size

Men's: S, M, L
Women's: XS, S, M

4 Lumbar tune

EVA shim offers the user two stages of contouring in the lumbar region for the perfect fit

See fit details and sizing charts on pages 122-124

CHASSIS SUPPORT 7075 aluminum, HDPE

SIDEKICK PACK *included*

Combination hydration reservoir sleeve and ultra-light removable daypack, perfect for unscheduled day trips, summit hikes, or supply runs into town during a thru-hike.

BALTORO

▲ Navy Blue -1598 ▲ Shadow Black -0614 ▲ Spark Red -0627

BALTORO 85

SMALL 65061 MEDIUM 65060 LARGE 65059

Appalachian, Pacific Crest, Continental Divide, Great Himalayan, Machu Picchu, Bibbulmun... you can hike them all. The Baltoro 85 offers massive capacity and the constantly-adapting comfort of Response A3 suspension, allowing you to tackle the longest self-supported trips on your list. With enough room for any expedition plus the kitchen sink, this 85-liter monster is the largest all-season backpack in our line.

MAX CARRY 27.2 kg | 60 lb
MAIN ACCESS top loader | front u-zip

	volume	weight	raincover weight	sidekick weight

PARAGON & MAVEN

LIGHTWEIGHT BACKPACKING

Our new lightweight backpacks shoot the gap between bare-bones ultralight and plush deluxe packs, with a weight-conscious design philosophy and the debut of Aerolon suspension. Sleek and nimble yet fully featured, these packs bring attitude and an advanced lightweight aluminum chassis for trailblazers who leave the kitchen sink behind. Aerolon's unique Matrix backpanel ventilation technology gives the collection the lightest and most comfortable customizable suspension in its weight class, while features like convertible hydration sleeve SideKick daypacks, integrated raincovers, and trail-access storage prove you can have your cake and eat it, too.

PARAGON & MAVEN

AEROLON SUSPENSION

A size-specific custom 7001 aluminum alloy chassis and ventilated, mesh-encapsulated matrix foam backpanel design make Aerolon suspension the lightest, most supportive suspension in its weight class. Aerolon's exceptional airflow and dynamic load management system give the Paragon and Maven packs more stability and on-trail comfort than competing lightweight backpacks.

ADJUSTABLE FIT ENGINEERING

Born from our Response A3 Suspension designed for the Baltoro and Deva, the Aerolon adjustable suspension utilizes an ultra-light 7mm Hollow 7001 aluminum frame with entirely new geometry and flexibility characteristics that gives the chassis its ability to span multiple Torso sizes without compromising the perfect fit to your back shape. The new stay curvature and aluminum flexibility we've engineered into the system accommodates 4" of torso adjustment to efficiently link the load of the pack to ensure you still get the superior fit and comfort expected from a Gregory suspension.

AEROLON TECHNOLOGY

A AEROLON SUSPENSION

uses a customized lightweight 7001 aluminum chassis design to deliver uncompromised ventilation and load stabilizing trail performance to reduce energy expenditure on the trail

B MATRIX VENTILATION SYSTEM

uses a foam-matrix backpanel structure encapsulated by breathable mesh to provide air flow and moisture evaporation, in order to reduce energy expenditure and increase comfort

C QUICK ADJUST HIPBELTS AND BACK HEIGHT

system provide the perfect fit every time, while the unique hipbelt adjustment allow the hipbelt pockets to move with the adjustment to maintain easy pocket access

D GRIPTION LUMBAR PAD

with soft-molded silicon gription pad technology for enhanced load transfer and energy savings

E 3D SHOULDER HARNESSSES & HIPBELT

with dual density lifespan EVA foam construction for an amazingly cush ride in a sub-four pound pack

SIDEKICK PACK *included*

Combination hydration reservoir sleeve and ultra-light removable daypack, perfect for unscheduled day trips, summit hikes, or supply runs into town during a thru-hike.

System on shoulder harness allows a quick, secure and scratch-free way to store your shades on the go

2 Raincover integration

Raincover stows in zippered compartment beneath front stuff pocket and doubles as accessory pocket

3 Trekking pole attachments

4 Adjustable backpanel
Adjustable backpanel height for the perfect fit everytime

5 Adjustable hipbelt pockets

Provide a unique adjustment allow the hipbelt pockets to move with the adjustment to maintain easy pocket access

6 Matrix ventilation system

Foam-matrix backpanel structure encapsulated by breathable mesh to provide air flow and moisture evaporation

PARAGON

▲ Sunset Grey -5586 ▲ Citrus Red -5585 ▲ Omega Blue -1640

NEW PARAGON 68

SMALL/MEDIUM 77859 MEDIUM/LARGE 77858

Nine times out of ten, a pack this light with this kind of capacity would be stripped of anything close to comfort or convenience. The Paragon 68 is the exception, tearing up the trail with lightweight, ventilated ease thanks to Aerolon suspension, and offering deluxe features you'd be hard-pressed to find inside its weight class. Looks like your long weekend plans just got a little lighter and a lot more comfortable.

MAX CARRY 23 kg | 50 lb

MAIN ACCESS top loader | sleeping bag access

	volume	weight	stripped weight	raincover weight	sidekick weight

	4150 in ³	3 lb 10 oz	3 lb 5 oz	3.7 oz	4.3 oz

NEW PARAGON 58

SMALL/MEDIUM 77857 MEDIUM/LARGE 77856

If a weekend in the woods is on your list, don't let a heavy pack keep you lagging behind. The Paragon 58 gives you room to haul the gear you want without making sacrifices, while simultaneously shaving weight to keep you light on your feet. A lightweight 7075 aluminum chassis and matrix ventilated foam backpanel drop ounces without dialing back on support, and you'll wonder if we used magic to pack in so many features (we did).

MAX CARRY 23 kg | 50 lb

MAIN ACCESS top loader | sleeping bag access

	2929 in ³	3 lb 3 oz	3.4 oz

NEW **PARAGON 38**

SMALL/MEDIUM 77853 **MEDIUM/LARGE** 77852

Put a peak in your sights and set off with the lightweight Paragon 38 on your back. At 38 liters, it has enough volume to gulp down extra layers, first aid, a bivy sack, and all the water and food you'll need, but its Aerolon suspension keeps it light and agile for scrambling. No mountains nearby? No problem: this bigger-than-a-day pack was born for flyweight flat-land overnights.

MAX CARRY 18 kg | 40 lb
MAIN ACCESS top loader | sleeping bag access

	volume	weight	raincover weight

NEW **MAVEN 65**

NEW **MAVEN 55**

XSMALL/SMALL 77851 SMALL/MEDIUM 77850

XSMALL/SMALL 77849 SMALL/MEDIUM 77848

A multi-day excursion in the mountains demands a light, nimble pack with plenty of support—not always an easy combination to find. Thanks to the Maven 65 and its lightweight Aerolon suspension, you can have both the svelte pack you want and the load management you need. Light on your back, but packing abundant trail-ready features, the Maven 65 embodies the modern approach to backpacking.

A heavy pack saps your energy and steals the fun out of long weekends in the backcountry. But when you're packing up camp and hitting the trail in the morning, slinging the Maven 55 over your shoulders is a totally new—and excellent—experience, thanks to its lightweight design, extensive feature list, and ventilated Aerolon suspension. Maybe it's time for an upgrade.

MAX CARRY 23 kg | 50 lb

STOUT & AMBER

BACKPACKING

The TrailFlex series offers modern function, streamlined looks, and incredible versatility for any adventure. Adjustable suspension and breathable backpanel technology provide a custom fit and enhanced comfort. Durable lightweight fabrics and purposeful feature sets deliver the exceptional performance and rewarding experiences worthy of Gregory's 40 years on the trail.

STOUT & AMBER

TRAILFLEX SUSPENSION

TrailFlex suspension combines a lightweight, stable, and proven internal wire frame design with custom torso length adjustment for a precision fit. The highly ventilated backpanel increases comfort across a wide range of conditions, allowing evaporative cooling in hot weather and increasing breathability in the cold. The TrailFlex chassis manages heavy loads across long distances by channeling weight to the padded lumbar region, while adjustable, pre-curved hipbelts and shoulder harness straps conform to the body without the need for break-in.

WHAT'S NEW

TRAILFLEX ADJUSTABILITY: The new TrailFlex is completely overhauled for 2017, with a fully adjustable back length adjustment as well as a dual hipbelt adjustment on the larger two styles. The hipbelt adjustment is the first in its class to provide comfortable and real load transfer at its largest setting, and the hipbelt pockets adjust with the belt, so you maintain easy access to your necessities.

VENTILATED BACKPANEL: The new Stout and Amber feature an on-the-back ventilation technology enhancement that provides enhanced airflow for a cooler ride and increased comfort on the trail.

NEW ORGANIZATION: Back by popular demand, we've added an oversized stretch-mesh front stuff pocket to the entire collection, making quick access to gear and overflow a cinch and delivering a more modern, streamlined pack silhouette.

NEW MATERIALS: The new 2017 material package has been engineered from the ground up. The main body materials, the chassis and the foam cocktails in the shoulder harnesses and hipbelts all have enhanced durability characteristics while maintaining the lightweight characteristics of the previous Stout and Amber, giving the 2017 collection a fine tuned balance of performance and long lasting appeal on the trail.

MATERIALS

- BODY** 200D x 900D high-strength dobby polyester & 210D ripstop polyester
- BASE** 630D ballistic polyester with 135 high-density polyester reinforcement layer
- LINING** 135D high-density embossed polyester
- HARNESS/HIPBELT/LUMBAR** dual-density CLPE foam
- CHASSIS SUPPORT** 3mm & 4mm spring steel wishbone frame

TRAILFLEX TECHNOLOGY

- A ADJUSTABLE TRAILFLEX SUSPENSION** quickly adjusts to fit your specific back and hipbelt length, allowing the pack to match your height and body geometry for a perfect fit every time
- B TRAILFLEX ADJUSTABLE HIPBELTS** are offered on the two largest packs in the collection with dual hipbelt pockets that move with the length adjustment, keeping your hipbelt pockets easily accessible
- C TRAILFLEX VENTILATION** technology provides enhanced airflow for a cooler ride and increased comfort on the trail
- D WISHBONE SPRINGSTEEL FRAME** design delivers stable load management with torsional flexibility, allowing the pack move with your body and minimize energy expenditure

PACK DETAILS

1 Adjustable trailflex suspension
Quickly adjusts to fit your specific back and hipbelt length, allowing the pack to match your height and body geometry for a perfect fit every time

2 Trailflex adjustable hipbelts
Are offered on the two largest packs in the collection

3 Front stretch stuff pocket
For gear overflow and organization

4 Solar ready
Solar cell attachment points on largest three styles

5 Dual zippered hipbelt pockets
For quick access items on the trail

6 Raincover integration
Raincover stows in zippered compartment beneath front stuff pocket and doubles as accessory pocket

STOUT

▲ Navy Blue -1598 ▲ Coal Grey -5588 ▲ Prairie Orange -5589

▲ ▲ **NEW** **STOUT 75**

ONE SIZE 77840

The Stout 75 offers the capacity to support classic hikes in revered locations like Yosemite and Glacier National Park, and brings adjustable TrailFlex suspension and features to provide a custom fit experience. The top-loading design makes quick work of packing up camp, while a front stuff pocket keeps layers accessible on the trail. Improved ventilation increases airflow to your back, and movable hipbelt pockets compensate for hipbelt adjustments.

MAX CARRY 23 kg | 50 lb
MAIN ACCESS top loader | sleeping bag access

	volume	weight	raincover weight
ONE SIZE	75 L	1.76 kg	105 g
	4577 in ³	3 lb 14 oz	3.7 oz

▲ ▲ **NEW** **STOUT 65**

ONE SIZE 77839

At home anywhere your own two feet can take you, the Stout 65 hits the mark for capacity and profile—just big enough for a week’s worth of lightweight camping gear, but not so big that it creates issues when you’re hopping on a train to the hostel in the next town. Updated TrailFlex suspension lets you customize the ventilated backpanel for a perfect fit, and a new front mesh pocket stows a jacket or a street map for unexpected itinerary changes.

MAX CARRY 23 kg | 50 lb
MAIN ACCESS top loader | sleeping bag access

ONE SIZE	65 L	1.73 kg	105 g
	3966 in ³	3 lb 13 oz	3.7 oz

STOUT 45

ONE SIZE 77838

Moving quickly is key when you have double-digit mileage to cover before you hit camp, and too much pack can slow you down. The Stout 45 puts you on schedule, with enough space for your gear and a bottom access panel for your sleeping bag. Adjustable TrailFlex suspension creates a custom fit to keep you nimble, balanced, and comfortable in tricky terrain, and a new front mesh pocket gives you a spot to stash larger items that might come in handy on the trail.

MAX CARRY 18 kg | 40 lb

MAIN ACCESS top loader | sleeping bag access

	volume	weight	raincover weight
ONE SIZE	45 L	1.29 kg	74 g
	2746 in ³	2 lb 13 oz	2.6 oz

STOUT 35

ONE SIZE 77837

You don't need a ton of space for summer overnight camping, beach-bivy surf trips, and weekend visits to the city, but when the campsite is on top of a ridgeline or the subway is 10 blocks away, you'll appreciate the Stout 35. Adjustable TrailFlex suspension supports loads that flimsy daypacks simply can't, and trail features like side pockets, hipbelt pockets, and a front stretch mesh pocket come in handy whether you find yourself in the woods or on a downtown studio couch.

MAX CARRY 16 kg | 35 lb

MAIN ACCESS top loader | sleeping bag access

	volume	weight	raincover weight

♀ **AMBER**

▲ Pearl Blue -2271 ▲ Chili Pepper Red -B104 ▲ Teal Grey -5590

NEW **AMBER 60**

ONE SIZE 77834

Whether exploring a slot canyon on your long weekend or navigating the twisting alleys of Istanbul on your semester abroad, the Amber 60 carries all your gear without looking or feeling cumbersome. Thanks to a streamlined profile and adjustable TrailFlex suspension, you get the load support you need, and a balanced, centered carry that rides close to the body, won't snag branches, and slips along crowded train platforms without bumping its way through.

MAX CARRY 23 kg | 50 lb

	3661 in ³	3 lb 9 oz	3.7 oz

NEW **AMBER 44**

ONE SIZE 77833

Ideal for overnights, the Amber 44 can be the bag you live out of as well as the pack you carry during the day. Large enough to carry all your gear for a weekend in the woods or a week crashed on your best friend's couch, the Amber 44 is still streamlined enough for afternoon trail hikes. Redesigned with an adjustable, fully ventilated backpanel, TrailFlex suspension makes this pack as comfortable to carry as it is easy to use.

ZULU & JADE

VENTILATED BACKPACKING & HIKING

The streamlined, lightweight Zulu and Jade feature our low-profile CrossFlo ventilated suspension, ultra-cushy shoulder harness design, and a new lumbar platform that provides increased comfort in all terrain. Low-profile cargo compartments bring the load closer to your body to improve balance, while a front stretch pocket makes it easy to grab and stash gear on the go. Tough, lightweight fabrics and reinforcements increase durability, and an upside-down U-zipper main access panel eases packing and unloading in the three largest styles.

ZULU & JADE

CROSSFLO DTS SUSPENSION

Gregory's proprietary CrossFlo suspension creates a physical space between the user and the pack without sacrificing load management or robbing excess volume from the storage compartment. A tensioned steel wire frame arcs over a wide, stabilized open mesh back panel to support the contents of the pack without contacting the wearer's back. Meanwhile, the harness yoke transfers load forces directly to the frame, which reacts by stiffening the system as the pack gets heavier. This dynamic chassis system allows air to flow around the user, increasing ventilation in hot weather and improving the breathability of waterproof outerwear in cold and wet conditions as well.

The larger packs in this series are upgraded with larger diameter frames and dual density foam layering in the hipbelts and shoulder harnesses, allowing the CrossFlo system to handle the extra weight with ease and deliver incredible comfort and energy savings during multi-day trips.

CROSSFLO DTS TECHNOLOGY

A LIGHTWEIGHT WIRE X-FRAME

provides superior load transfer directly to the lumbar pad and hip belt

B DYNAMIC YOKE

integrates the shoulder harness directly to the X-Frame, activating the suspension as the weight increases to automatically balance flexibility and stiffness in the frame

C SUSPENDED MESH BACK PANEL

for superior ventilation

D VENTILATED MESH

on harness and hipbelt and adds breathability and decreases weight

E HPDE FRAME SHEET WITH ANTI-BARRELING STAY

MATERIALS

BODY 210D high-tenacity nylon,
100 high-tenacity nylon

BASE 210D high-tenacity nylon

LINING 135D high-density polyester

HARNESS/HIPBELT/LUMBAR
multi-density, comfortzone lifespan EVA

CHASSIS SUPPORT
spring steel, HDPE

PACK DETAILS

1 Hipbelt pockets
Dual zippered hip belt pockets

2 Front stuff pocket
Front stretch-woven stuff pocket with surface-mounted quick-release buckle closure

3 Raincover integration
Integrated raincover in a dedicated external-access pocket that doubles as accessory storage in mild weather

4 Front U-Zip access
To main compartment on packs 33L & larger

5 Multi-straps
Removable via girth, adjustable straps that can be positioned at multiple lash points on the exterior of the pack (53/55 & 63/65)

6 Side pockets
Dual stretch mesh side pockets

ZULU

▲ *Feldspar Grey* -4847 ▲ *Moss Green* -1577 ▲ *Navy Blue* -1598 ▲ *Burnished Orange* -4844

ZULU 40

MEDIUM 68435 **LARGE** 68436

The Zulu 40 offers more room than a daypack, making it ideal for warm-weather overnights and all-day winter outings. Far lighter, cooler, and more trekkable than an alpine pack, but tough enough to withstand serious use, the Zulu 40 gives you the features and details of a full-sized pack without the weight or the bulk.

MAX CARRY 16 kg | 35 lb
MAIN ACCESS top loader | front U-zip

MEDIUM	40 L	1.33 kg	85 g
	2441 in ³	2 lbs 15 oz	3 oz

ZULU 35

MEDIUM 68432 **LARGE** 68433

When you're standing on the first peak and your goal is two, maybe three more by sundown, you'll be glad you have the Zulu 35 on your back. It's the perfect pack for setting personal ridge-running records, thanks to its incredible load balance and the supreme ventilation of CrossFlo suspension.

MAX CARRY 16 kg | 35 lb
MAIN ACCESS top loader | front U-zip

	volume	weight	raincover weight
MEDIUM	35 L	1.25 kg	77 g
	2136 in ³	2 lbs 12 oz	2.7 oz

ZULU 30

MEDIUM 68430 **LARGE** 68431

The smallest pack in the Zulu series stands tall with technology, making up for any loss in volume with the heat-taming prowess of CrossFlo ventilated suspension. While other packs get heavier as the day goes on, the Zulu 30 runs so cool and light that your post-lunch return route will feel as fast and fun as the first five miles.

JADE 38

SMALL 68403 **MEDIUM** 68429

More volume than a daypack, less bulk than a full-on backpacking pack, incredible comfort and weight—that's the Jade 38 in a nutshell. Ready for any overnight you can throw at it, or even multi-night missions if the weather's warm and you pack light, this is the pack you want for taking down that ridgeline epic or three-day desert route.

MAX CARRY 16 kg | 35 lb

SALVO & SULA

VENTILATED HIKING

Deciding on a day hike is easy—just point your toes toward the nearest trailhead or head out the door for a loop through the park. The Salvo and Sula packs make finding proper fit, function, and up-to-the-minute technology in a dayhiking pack intuitive and simple. These packs are all about moving fast, cool, and light with zero stress, thanks to straightforward adjustments, low-profile FreeSpan suspension, and ventilated harness and hipbelts. Their versatile array of compartments and features give you confidence for any adventure, and their bright, edgy designs stand out from the trail crowd.

So go ahead—grab a Salvo or Sula pack and hit the ground running. They'll be ready when you are.

SALVO & SULA

FREESPAN SUSPENSION

Our FreeSpan ventilated suspension utilizes a proprietary leaf spring lumbar support integrated into a spring steel perimeter frame, allowing for total flow-through ventilation while maximizing interior bag volume. A ventilated lumbar pad and ventilated harness help to further improve airflow, while low-profile cushioning keeps the weight of the pack tucked in tight to the lower back for improved stability and load-bearing comfort.

FREESPAN TECHNOLOGY

- A LOW PROFILE FREESPAN VENTILATION**
maximizes pack capacity while keeping the load close to your back
- B VENTILATED LIFESPAN**
EVA shoulder harness foam
- C VENTILATED HIGH COMFORT**
EVA hip belt foam
- D LIGHTWEIGHT PERIMETER WIRE FRAME**
with lumbar "leaf spring" design for all day support and comfort

DETAILS

- ✦ Adjustable upper and lower trekking pole attachment system with reflective webbing
- ✦ Custom molded zipper pulls
- ✦ Internal hydration sleeve with hose management
- ✦ Compression straps
- ✦ Internal zippered organization pocket

MIWOK & MAYA

ACTIVE TRAIL

Our Miwok and Maya packs exemplify clean, athletic design, with thoughtful features and a fit that adapts and conforms for consistent performance in all terrain. BioSync suspension features flexible tendons that move with as you bag peaks, shred singletrack, or sprint from summit to summit. Durable lightweight fabrics and thoughtful organization make these packs simple and easy to use on the trail, and the Biosync suspension allows you to forget about the pack on your back and enjoy the view.

MIWOK & MAYA

BIOSYNC ATS SUSPENSION

BioSync Active Trail suspension (ATS) offers the flexibility and shock absorption required for active, fast-paced trail use, in a lightweight, durable suspension system that has no moving parts.

BioSync ATS is designed to mimic human joint construction by using a series of flexible synthetic connectors to join the shoulder harness and hip belt to the pack frame, just like tendons join muscle to bone in the body. This allows the harness and hip belt to flex and move independently of the pack without reducing load support, meaning you can run, jump, ride, scramble, and climb freely while your gear stays secure and balanced on your back. The elimination of rigid parts not only simplifies the system and increases durability, but creates a more direct connection between the user and the equipment.

BIOSYNC ATS TECHNOLOGY

- A FLEXIBLE TENDONS**
attach the shoulder harness and hip belt to the pack keeping it balanced to move with the body in motion
- B CURVED BACKPANEL**
for ideal fit and optimal weight transfer
- C WIDE HIPBELT**
adds stability helping to more efficiently distribute the weight

- D MOISTURE-WICKING**
harness and hip belt help you stay dry
- E DIE-CUT FOAM**
on the harness and backpanel adds breathability and decreases weight

KEEPING YOU COOL & HYDRATED

With fast moving, highly aerobic activities like mountain biking and peak bagging, proper hydration and keeping cool are paramount to optimal performance and enjoyment. Airflow and water intake combine to keep you cool during active pursuits so you can achieve peak performance.

- Easy hydration access for quick and simple refills through the external sleeve
- Tube routing and keeper clip on the shoulder harness for fast engagement and secure stowage
- Moisture wicking harness, hip belt and back panel to draw perspiration away from the body

MATERIALS

- BODY** 100D nylon, 100D x 280D nylon twill
- BASE** 100D nylon
- LINING** 135D high-density polyester
- HARNESS/HIPBELT/LUMBAR**
EVA foam, airmesh
- CHASSIS SUPPORT**
HDPE and EVA foam

PACK DETAILS

1 Quick-access pockets

Dual hip belt pockets on all sizes

ALPINE & SKI

DENALI | ALPINISTO | TARGHEE

The Gregory Alpine and Ski series draw upon 40 years of experience in pack design and engineering, bringing the best of our knowledge and expertise to face the most demanding conditions on the planet. Our partnerships with top mountain athletes and countless hours of real world field-testing in demanding locations throughout North America, Europe and Asia have created fully optimized packs for modern mountaineering and alpine adventures.

Through time-tested technology and a focus on alpine needs, we deliver three pack series, each committed to on-mountain reliability, performance, and customization. Offering a range of volumes and feature sets within each series, the Denali, Alpinisto, and Targhee provide mountain athletes an option for any alpine pursuit.

FUSION FLEX PRO SUSPENSION

The high alpine is the proving ground that pushes people and equipment to their limits. Fusion Flex Pro represents the pinnacle of suspension performance, combining cutting-edge materials with time-tested Gregory design to give mountain athletes unassailable strength, exceptional load support, and outstanding versatility in the most challenging terrain and conditions on the planet.

FUSION FLEX PRO TECHNOLOGY

A TWIN ALUMINUM STAYS
can be quickly removed to save weight

B INTEGRATED FUSION PRO SEWN-IN FRAMESHEET CONSTRUCTION
optimizes back protection from your gear, reduces failure points and keeps the weight down

C HOLLOW, LIGHTWEIGHT ALUMINUM ANTI-BARRELING CROSS-STAY
provides unmatched stability and ensures your center of gravity is optimized

D MOLDED EVA BACKPANEL FOAM
sheds snow and incorporates elastomeric anti-slip technology on to the critical lumbar pad contact point

E AUTOCANT HARNESS
adjusts to each individual shoulder angle for a custom fit

F F3D PRE-CURVED PRO HARNESS
adjusts to each individual shoulder angle for a custom fit

G ANTI-SLIP LUMBAR PAD
correctly transfers load to hips

STRIPPABLE

The removable frame stays, top pocket, bivy pad and hipbelt padding allow this pack to conform to the needs of the day.

Adjustable ice axe loops
with metal toggles for leashless and mixed climbing tools

Expedition hipbelt
with sled pull attachment, gear loop, ice clipper slot and zippered pocket

DENALI

▲ Basalt Black -2917

DENALI 100

SMALL 64919 MEDIUM 64918 LARGE 64917

The Denali 100 remains the pinnacle of big-mountain expedition performance. With the ability to comfortably carry heavy loads into harsh environments over demanding terrain, this pack provides confidence and reliability every step of the way. The removable frame stays, top pocket, bivy pad and hipbelt padding allow this pack to conform to the needs of the day.

MAX CARRY 36 kg | 80 lb

MAIN ACCESS top loader | front access

	volume	weight	stripped weight

MEDIUM	75 L	2.78 kg	1.81 kg
	4577 in ³	6 lb 2 oz	4 lb

PACK DETAILS

Side slash zipper for easy access to main body

Large, fold-away side pockets

Tubular gear loops and reinforced daisy chain on front of pack

Dual layer, internally laminated TPU front panel to protect against crampons and ice tools

High visibility interior

Multi-layer bottom panel is highly puncture and abrasion-resistant

Multi-use spare straps daisy chain lash, top pocket carry sling

V-compression on lower sides integrates with side pocket functionality

Cross-over front compression provides complete bag compression as well as alternate attachment system

Zippered, quick-access side pocket for headlamp and map access

Hydration reservoir sleeve and port

MATERIALS

BODY 210D nylon, 420D high-density nylon

BASE high-tenacity 630D nylon w/ foam and 135D high-density polyester reinforcement layers

LINING 210D nylon

HARNES/ HIPBELT/ LUMBAR multi-density closed and open cell foams

CHASSIS SUPPORT dual 7075 aluminum stays

ALPINISTO ALPINE

The Alpinisto pack line is built for professional mountaineers and serious athletes and is used in some of the most severe places on earth. These packs are unrivaled in performance, durability and comfort in the alpine world and are capable of carrying everything you need for extended alpine adventures and versatile enough to use on summit day.

FUSION FLEX SUSPENSION

Fusion Flex is a lightweight, robust suspension system designed for harsh alpine environments. Its single aluminum stay and die-cut HDPE frame sheet provide crucial load support while the climbing-specific hip belt and harness maintain comfort for technical ascents.

Fusion Flex combines crucial load management, and simple, durable design to offer climbers the ideal alpine-minimalist pack suspension system. A die-cut HDPE frame sheet and single formed 7075-T6 aluminum center stay provide support for heavy loads, and a cross-stay prevents barreling after hasty packing efforts in harsh weather. Meanwhile, the snow-shedding back panel resists moisture absorption, and removable padding in the high-cut, harness-compatible hip belt allows for maximum weight reduction without the loss of support. Tapered, dual-density shoulder padding and an anti-slip lumbar pad maintain mobility and proper load transfer over waterproof layers.

FUSION FLEX TECHNOLOGY

- A DIE-CUT HDPE FRAMESHEET** with a 7075-T6 aluminum stay creates ideal support structure and optimal load transfer
- B TAPERED DUAL-DENSITY PADDING** in shoulder harness maximizes freedom of movement
- C CROSS-STAY** ensures the pack will not barrel under heavy loads
- D HIGH-CUT DUAL-DENSITY HIPBELT** integrates with a climbing harness
- E REMOVABLE PADDING IN HIPBELT** shaves weight (waist webbing is fixed and provides stability when padding is removed)
- F THERMO-FORMED BACKPANEL** fits snug against the back and sheds snow
- G ANTI-SLIP LUMBAR PAD** correctly transfers load to hips

ALPINISTO

▲ Marine Blue -1531 ▲ Basalt Black -2917

ALPINISTO 50

SMALL 65050 MEDIUM 65049 LARGE 65048

This technical, alpine climbing machine goes from sturdy load hauler to lightweight summit bag with the swift removal of components. The 50-liter size is perfect for an overnighiter or when you need to bring a little extra gear.

ALPINISTO 35

SMALL 65067 MEDIUM 65066 LARGE 65065

A perfect alpine pack for a long day on the mountain, The Alpinisto 35 is the pack of choice for ice or alpine pursuits. When you need to be even faster and lighter, simply remove the frame sheet/stay, bivy pad and hip belt to shed more than 453g (1 lb. 2 oz.).

MAX CARRY 16 kg | 35 lb

MAIN ACCESS top loader | side access

	volume	weight	stripped weight
MEDIUM	35 L	1.5 kg	1.6 kg
	2136 in ³	3 lb 6 oz	2 lb 2 oz

PACK DETAILS

Removable hip belt padding for weight saving

Stowable crampon pocket with TPU panel to protect contents from sharp points

Dual ice axe attachment system compatible with all modern tool head designs

Top pocket occipital cutout for optimal helmet clearance

Main pack body closure with single, anodized hook for maximum durability

Hydration hose port with locking zipper

Single wand pocket

Side-zip access to main body

Dual ski slots

Sled pull attachment points integrated into hip belt

Bright interior color for easy visibility of gear

Security pocket under lid with key clip

Removable bivy pad

Rope Strap & Haul loops

Gear loops and ice clipper slots on hip belt

MATERIALS

BODY 210D nylon, 420D high-density nylon

BASE 630D high-density nylon

LINING 210D nylon

HARNES/ HIPBELT/ LUMBAR multi-density closed and open cell foams

CHASSIS SUPPORT 7075 aluminum

TARGHEE SKI

The Targhee ski pack line has found the sweet spot between durability, weight and intuitive functionality. Our steady evolution of the Targhee line over the years can proudly claim a long list of awards for its backcountry usability and world-class comfort, which has long kept these bomber ski packs front of mind for the educated backcountry enthusiast. Through time-tested technology and a focus on the unique and inevitably flexible requirements for a wide range of backcountry pursuits, the most advanced Targhee collection in our history delivers the on-mountain reliability and fully loaded feature set you expect in a world class ski pack.

VERTIFLEX SUSPENSION

VertFlex suspension meets the needs of snow sports athletes who require vertical stability for heavy loads in addition to torsional flexibility for free range of motion while skiing, snowshoeing or snowboarding.

We design these packs specifically for winter use, sizing them to be worn over cold-weather outerwear and using water-resistant, high-density foam covered by snow-shedding fabric in the back panel, harness, and hip belt. The smaller VertFlex packs rely on a flexible HDPE frame sheet for lightweight, low-profile load support, while the larger models offer additional stability in the form of a perimeter wire wishbone internal frame with a cross-stay.

VERTIFLEX TECHNOLOGY

- A VERTICALLY STABLE**
to maintain a balanced and secure load
- B TORSIONAL FLEXIBILITY**
to accommodate the dynamic movements of skiing and riding
- C MOLDED BACKPANEL**
with classic Gregory lumbar pad for optimal load transfer to hips
- D SNOW SHEDDING DESIGN**
reduces absorbed water and keeps you dry
- E INCREASED HIPBELT PADDING**
in larger packs to accommodate heavier loads
- F OPTIMIZED HARNESS PADDING**
reduces bulk for greater freedom of movement combined with a comfortable carry
- G HDPE FRAMESHEET**
in the smallest model with an added cross-stay and wire wishbone perimeter frame in the larger models
- H INSULATED HYDRATION SLEEVE**
integrated into shoulder harness

TARGHEE 45

SMALL 74489 MEDIUM 74490 LARGE 74488

A great guide pack or for longer tours and overnight trips, the Targhee 45 has ample room for larger, on-mountain loads.

MAX CARRY 16 kg | 35 lb
MAIN ACCESS top loader | full rear-panel u-zip

	volume	weight
MEDIUM	2746 in ³	3 lb 14 oz

TARGHEE 32

SMALL 74485 MEDIUM 74483 LARGE 74482

A perfect balance of volume, features and carry convenience, the Targhee 32 is the ideal, all around ski pack. Ready to spend a full day exploring the backcountry.

MAX CARRY 16 kg | 35 lb
MAIN ACCESS hybrid top loader | full rear-panel u-zip

	volume	weight
MEDIUM	32 L	1.5 kg
MEDIUM	1953 in ³	3 lb 7 oz

TARGHEE 26

ONE SIZE 65544

Great for a half to full day of touring, the Targhee 26 has well-thought-out features that allow you to focus on the task at hand and enjoy your backcountry experience.

STYLE SPECIFIC FEATURES

- Top internal zippered pocket to secure keys and valuables
- Partial padding on hipbelt balances comfort, mobility and weight savings

MAX CARRY 14 kg | 30 lb
MAIN ACCESS top loader | full rear-panel u-zip entry

	volume	weight
ONE SIZE	26 L	1.3 kg
ONE SIZE	1587 in ³	2 lb 14 oz

PACK DETAILS

1 Safety whistle
On chest harness buckle for quick access

2 Insulated hydration sleeve
Helps prevent tube from freezing, with easy entry port on shoulder harness

3 Dedicated avalanche safety pocket
Is easy to access, with dividers for a shovel, probe and other vital accessories

4 Top accessory pocket
Large enough to stow goggles

5 Aluminum hooks and snow plow buckles
For winter use without risk of freeze/clog

6 Zippered backpanel entry
Allows convenient access to gear

GEAR CARRY OPTIONS

- 1 A-FRAME SKI CARRY
- 2 STOWABLE SNOWSHOE OR SNOWBOARD CARRY
- 3 STOWABLE HELMET CARRY
- 4 DUAL ICE AXE CARRY

MATERIALS

- BODY 210D 66 nylon
- BASE 630D high-density nylon
- LINING 135D high-density polyester
- HARNES/ HIPBELT/ LUMBAR multi-density closed and open cell foams

DESIGN PHILOSOPHY

In 1977 we started building packs around one simple, but groundbreaking philosophy: a properly designed pack is worn, not carried. Proper design means proper fit, and when a pack fits the right way, it works with you, not against you, saving energy and opening a whole new world of comfort you may never have thought possible. This philosophy of bag design permeates every stage of product design at Gregory, and results in the industry's best-fitting packs for every pursuit.

AWARD WINNING COMFORT

We all pay close attention when trying on a new pair of shoes, making sure they fit the length, arch curvature and width of our feet. You should think about a new pack in the same way, considering torso length, body shape, harness comfort, and support for the load you'll be carrying. Every Gregory pack features load-bearing curvature built into the backpanel, designed to match the shape of your spine in the same manner as proper arch support matches your feet. Since 1977, we have won countless awards around the world for our leadership, focus and understanding of body geometry and load transfer. Our goal is and always has been to deliver the most comfortable packs in the world.

ENERGY SAVINGS

In our experience, the less energy you use with every step, the more you'll enjoy the journey. Sometimes this means knocking out a few more miles of trail than you expected; other times it's about having more fuel in the tank at the end of the day to fire up the BBQ and share the experience with friends. Either way, it's easy to see why energy efficiency is at the heart of our design approach—it's a huge factor that's often left by the wayside in gear design. Until you experience a properly designed and properly fitted pack, you'll never know how great your next journey could be.

TORSO/BACK LENGTH SIZING

A common misperception is the assumption that because you wear a large T-shirt, a size large backpack is your proper size. This is simply not the case. Torso length runs independent from overall height, meaning two people of the same height and weight may be as far as two pack sizes apart.

Taking just a few minutes to accurately measure your torso length ensures you'll make the best choice within any given series of Gregory packs. Follow these three simple steps to identify your torso length, and commit your torso measurement to memory just as you do your shoe size. Fully grown adults should only have to do this once in their lives, and the fit chart below will help you select the correct size in any Gregory pack style you choose.

1) Locate your ILIAC CREST

The top of your hipbone directly on the sides of your body and aligned with your pants seam - usually the top of these bones are located at a similar height to your belly button

2) Locate your C7 Vertebra

The largest bump near the base of your neck

3) Measure the vertical distance between the two

From your C7 straight down your spine to where it intersects with a line drawn across your iliac crest

HIPBELT SIZING

While we optimize every Gregory pack to fit most body shapes and sizes, certain collections have interchangeable hipbelts or adjustable hipbelt lengths to help you find the perfect fit.

A simple rule of thumb is that the ideal distance between the ends of the hipbelt pads after tightening should be 3 to 5 inches. However, the most important criteria are that the hipbelt wraps clear over the side of your body and that it rests 1 inch above your iliac crest. This allows proper load transfer to your skeletal structure, which maximizes comfort and minimizes energy expenditure.

HARNESS SIZING

There's no need to over-complicate shoulder harness fit. We carefully engineer every one of our products to fit a wide range of body shapes and sizes, and the harness lengths are proportional to the pack height, so they almost always fit perfectly. Just try on the pack, adjust the hipbelt, and then adjust the harness. If it feels good, great!

Our Deva and Baltoro packs have customizable, interchangeable harnesses for achieving the next level of precision fit. To determine if you need a different harness size in a Deva or Baltoro, first ensure your torso length is correct and the hipbelt is properly positioned, then put some weight in the pack and tighten the harness. If the harness feels uncomfortable or the padding portion of the harness does not extend to the region on the side of your body directly below your armpit, simply swap out for a larger or smaller harness size with your local Gregory retailer.

In between sizes?

Always better to size down to ensure harness load lifters can lift the pack weight onto the hipbelt and function properly. However, the general rule is for slimmer upper body builds, always size down - for broader upper body builds, size up to ensure harness padding coverage.

We've been helping you get outside for almost 40 years, by building uncompromised product that gets you and your gear to wherever you're going. We believe the outdoor experience is enhanced when you have incredibly comfortable, intelligently designed, premium quality equipment you can trust without question.

We are relentless about this simple, but also very challenging product creation philosophy, because we know that getting out—whether to scale a mountain peak or pedal across town—is paramount to our quality of life. We feel like anything and everything we love to do is simply better when we do it outside. So above all else, we do not compromise on the time we spend under open skies with our compadres in life, and the products we build are a direct result of this philosophy.

GREGORY GUARANTEE

Over the past 40 years, Gregory packs have earned an unmatched reputation for quality and reliability. We know that the quality of your experience depends on the reliability of your gear. That's why we don't build packs to last a season or two—we build them to provide you with a lifetime of high-performance and enjoyment.

THE GREGORY LIMITED LIFE TIME GUARANTEE

We build Gregory gear to last a lifetime and that's how long we stand behind it. We guarantee you that this product will be free from defects in materials or workmanship, for as long as you own it.

This warranty does not cover damage due to unreasonable use or improper care. (Sorry, no free repairs if you have been using your pack as a feed bag for bears or cleaning it with white gas).

THE **WHITE MAZE** EXPEDITION

The Team of "ONEKOTAN - THE LOST ISLAND" accidentally ran into a new adventure. On their flight home they scoped the most perfect Mountain Range in the World. It's not about snarling something. It is about accomplishing a mission although it seems impossible. Inhaling the beauty of nature is the key motivation. The impossibility of the mission is just a side effect...
